РАБОЧИЙ ЛИСТ «NATURAL DISASTERS»

ДЛЯ УЧАЩИХСЯ 8 КЛАССА

Аннотация: рабочий лист «Стихийные бедствия» разработан для повторения и активизации вокабуляра и речевых формул по предложенной теме. Он посвящен обобщающему повторению, органично соединенному с диагностикой, проверкой и оценкой знаний учащихся, и включен в систему уроков по теме «Стихийные бедствия» («Natural Disasters») как завершающий данную тему с учетом программных требований по развитию лексических навыков. Рабочий лист предназначен для учащихся 8 класса. Вид работы: парный.

Ключевые слова: парная работа, «Natural Disasters», Worksheet, повторение и активизация, 8 класс.

*Natural Disasters Worksheet**1. Match*

Tsunami	Наводнение
Hurricane	Извергать
Earthquake	Эвакуировать
Tornado	Цунами
Disaster	Ураган
Flood	Лава
Lava	Торнадо
Erupt	Землетрясение
Evacuate	Засуха
Drought	Катастрофа, бедствие

2. Reorder the letters to find these natural disasters.

- 1) dolof 2) chirunare

- 3) ground 4) quatehaker
5) unmiats 6) puter

3. Fill in the table according to the texts.

<i>Questions</i>	<i>Student A – Hurricanes</i>	<i>Student B – Floods</i>
What are they?		
Why do they happen?		
Where do they happen?		
How do they affect people?		

Hurricanes

Tropical storms with strong winds. They start at sea, and can travel a long distance. They have different names in different places: «hurricanes» in the Atlantic Ocean, «typhoons» in the Pacific Ocean, «tropical cyclones» in the Indian Ocean and around Australia.

Tornadoes, or whirlwinds, are similar, but begin over land.

The water evaporates from the warm sea. This condenses in the atmosphere. More and more hot, wet air rises up. It becomes a strong wind.

Over the warm parts of oceans. Tornadoes are common in parts of the U.S.A, Australia, and Japan.

They can affect ships, blow down houses, cause floods and disrupt traffic.

Scientists can usually track hurricanes, but they cannot stop them.

Floods

The water in rivers, lakes or the ocean rises above its normal level and goes onto the land.

If there is a lot of rain, or very strong winds, floods can happen.

Some rivers in Bangladesh and India flood every year. People expect it, so there is no panic. When the floods go down, there are lots of minerals in the soil. They can grow good plants.

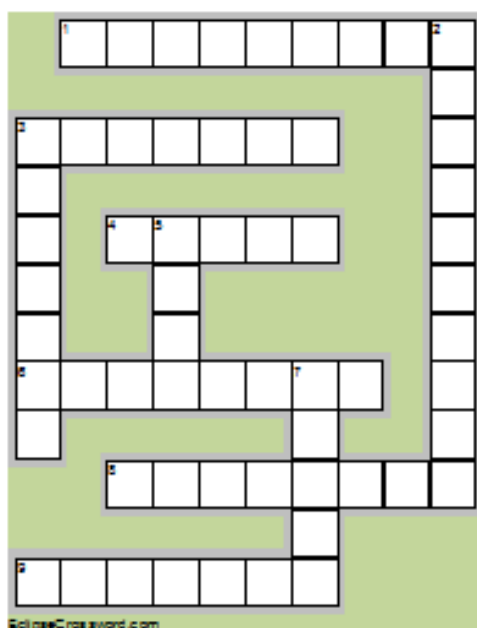

When the floods are a surprise, many people can drown. Every year, people lose their houses and their furniture. When floods happen every year, some people are ready for them. But many people (and governments) do not prepare properly.

Dams can reduce floods – but some dams can cause them! There are often «flood warnings» on the radio.

4. Solve the crossword

Across

1. a very strong wind in west Atlantic
3. tidal wave
4. a large amount of water spread from a river, sea etc. that covers an area that is normally dry
6. a very bad event, causing harm or death
8. move somebody from a dangerous place
9. a long period without rain

Down

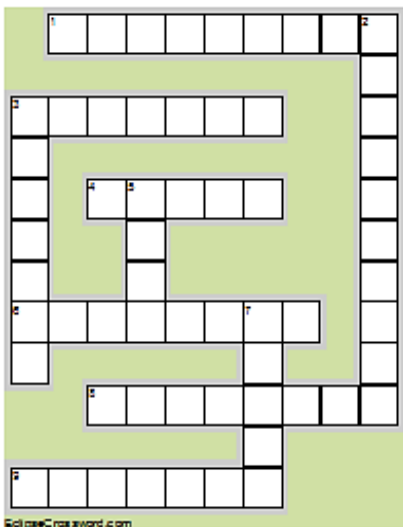

2. a sudden violent movement of the ground
3. a strong wind that blows in a circle
5. hot liquid rock
7. (of a volcano) to explode and throw out fire, lava, smoke etc.

Evaluation Sheet

Task 1 – 30 (3 points for every right variant)

Task 2 – 10 (2 points for every right variant)

Task 3 – 30 (3 points for every right variant)

Task 4 – 30 (3 points for every right variant)

Total: 100

Keys

1. Match.

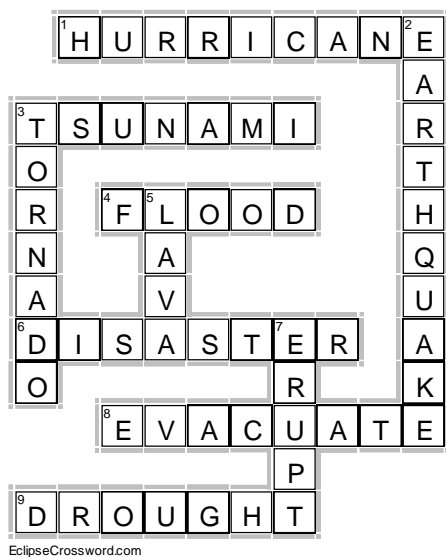

2. Reorder the letters to find these natural disasters.

1. Flood
2. Hurricane
3. Drought
4. Earthquake
5. Tsunami
6. Erupt

3. Fill in the table according to the texts.

Questions	Student A - Hurricanes	Student B – Floods
What are they?	Tropical storms with strong winds.	When the water in rivers, lakes etc rises above its normal level and goes onto the land.
Why do they happen?	Warm water evaporates from the sea, condenses in the atmosphere and becomes a strong wind.	If there is a lot of rain or very strong winds.
Where do they happen?	Over warm parts of the ocean.	Some rivers in Bangladesh and India flood every year.
How do they affect people?	Blow down houses, cause floods, disrupt traffic and affect ships.	People can drown, lose houses and furniture.
What can people do?	Scientists can track hurricanes, but they can't stop them.	Dams can reduce floods. Listen to the 'flood warnings' on the radio.
